

Intermap Technologies and Map Your World Partner to Enable a Wide Variety of GIS and Geospatial Solutions

DENVER & Austin, TX (June 15, 2007) Intermap Technologies, Corp. (TSX: IMP.TO, AIM: IMAP.L) and Map Your World today announced a partnership where Map Your World, a regional distributor of online geospatial products and services for the southwest and southeast United States, has agreed to distribute Intermap's precise 3D digital elevation models and images.

Map Your World provides services ranging from single custom paper maps to digital maps and data, combined with training and support for using a GIS database. Map Your World's core client base includes landowners and GIS professionals in the oil and gas, pipeline, real estate, transportation, and public use markets.

According to Lee Lugge, owner of Map Your World, "Whether our customers need to assess a proposed drilling location or require countywide aerial imagery, Intermap's proven elevation models and geometric images will enable our customers to develop timely, accurate, and affordable geospatial solutions. But what is truly exciting is the fact that Intermap is collecting precision mapping data for entire states and countries, which will allow me to satisfy the wide-area mapping needs of more end users."

Under the terms of the agreement, Intermap provides existing core datasets, including high-resolution digital terrain models, digital surface models, and orthorectified radar images, immediately available to Map Your World. Additional data, based on the Company's ongoing NEXTMap® countrywide mapping program, will be delivered as it becomes available.

"This is a great opportunity for both parties," said Richard Smolenski, Intermap's vice president of sales. "Not only will Intermap be able to target a GIS-savvy audience with some of the most reliable and uniform elevation data available, our superior elevation models and images will also enable our new partner to expand the extraordinary suite of value-add products they already offer."

About Map Your World

Map Your World provides global positioning system (GPS) satellite mapping for oil field services and other applications. It also specializes in database creation and management for geographic information systems (GIS). Additional applications supported by Map Your World include oil and gas development, exploration, and production; landowner maps for farming, ranching, and hunting, real estate development; and public use and utility mapping. About Intermap Technologies

Intermap enables customers to facilitate better decision-making and create applications for numerous commercial, governmental, military, and consumer products through the purchase of high quality and affordable 3D geometric datasets. The Company is proactively remapping entire countries and building unprecedented national databases, called NEXTMap®, consisting of highly accurate digital geometric maps that include elevation data.

Demand for NEXTMap® data is growing as new commercial applications are emerging, including geographical information systems (GIS), engineering planning, transportation, automotive, navigation, flood, irrigation, environmental management and planning, telecommunications/wireless network planning, aviation, simulation, and 3D visualization.

Internet applications include virtual tours, topographic maps and computer games. Datasets are also used to add interactive intelligence to airborne and satellite imagery.

Headquartered in Denver, Colorado, Intermap employs more than 425 people worldwide, with additional offices in Calgary, Detroit, Jakarta, London, Munich, Ottawa, and Prague. For more information, visit www.Intermap.com.
